Short Term Intervention Service

- In partnership with Customer Care provide Information, Advice and Assistance to support people to help themselves
- Undertake a proportionate response
- Provide early intervention via preventative services to support independence and minimise the need for ongoing services
- Only those people whose needs cannot be met in any other way are managed by long term social care service.

Outcomes

- Reduce number of adults referred to a statutory service for assessment
- Reduce number of long term services

How well are we doing?

Right Service, Right Time, Right Place

Single Point of Entry

Short Term Intervention Performance

- **Adaptations and Community Equipment (ACE)**
- **80 % assessments completed on time – current performance 88%**
All referrals allocated in under 56 days

Year	Ave. No. of people on waiting list	Ave. days taken to allocate
2013	706	78
2014	140	33
2015	172	23
2 nd ¼	408	43

- **Sensory**
- **80% of assessments completed on time – current performance 86%**
All referrals allocated in under 56 days

Year	Ave. No. of people on waiting list	Ave. days taken to allocate
2013	174	80
2014	114	53
2015	111	47
2 nd ¼	51	26

Short Term Intervention Performance cont.

Single Point of Access (SPA)

- *Triage all referrals within 24 hours*
 - 100% achieved over the past 2 years

Short Term Care Management

- *No waiting lists in place - over 2 year period the service received approx 2,300 assessment requests, a waiting list has been operational on two separate occasions for 1 week on each occasion. In total only 35 people waited over 1 week for allocation of a worker for assessment*
- *Target of 80% of assessments completed on time – over the past year 94% completed on time*

IC & R

- *3 year WG outcome target set 1278 people access a Reablement Service*
 - 2013/14 1424 people
 - 2014/15 1582 people
 - 2015/16 Quarter 1 405 people
 - 90% of people felt they achieved their goals

Short Term Intervention Performance cont.

IC & R continued

65% independent of services at the end of service

- Since April 14 between 75 – 81% independence levels achieved

Of those who left services independent any return to social care is tracked

- 3 mths later 68% remain independent of services
- 6 mths later 58% remain independent of services
- 12 mths later 50% remain independent of services

What does this mean for the person and the Council?

- Independent of service provision is able to continue as previously without reliance on formal service
- Cost avoidance - previously services would have been commissioned
- Less reviews in the system

How do we know?

Escalation process

- To minimise risk an escalation process in place to ensure all referrals triaged and responded to in a timely manner
- Use of team resources - rotate staff to other areas of service under pressure or reassign work throughout the team (therapists to risk assessor/care manager to risk assessor/rotation with ACE/ seniors and managers work at SPA)

Issues logs

- Team maintain an issues logs where all members of the teams are encouraged to add any problems, issues or concerns to the issues logs. These are then reviewed 2 weekly at the managers meetings and actions taken recorded. Any trends or unresolved issues are reported to the Head of Service.

Databases

- Any issues which appear to have trends a separate database is established to monitor until the effect of the trend can be established then appropriate actions taken to address.

How do we know?

- Performance information
- Electronic performance books at team and individual level
- Trend data over a 1 year period for IC & R
- Service user satisfaction surveys
- Quality assurance audits of assessments, observations of practice
- CSSIW reports for direct services – no regulatory requirements over the past 3 years
- RCT IC & R service in partnership with SSIA produced a resource document to support other areas to establish a Dementia Reablement Service

How can we improve things further?

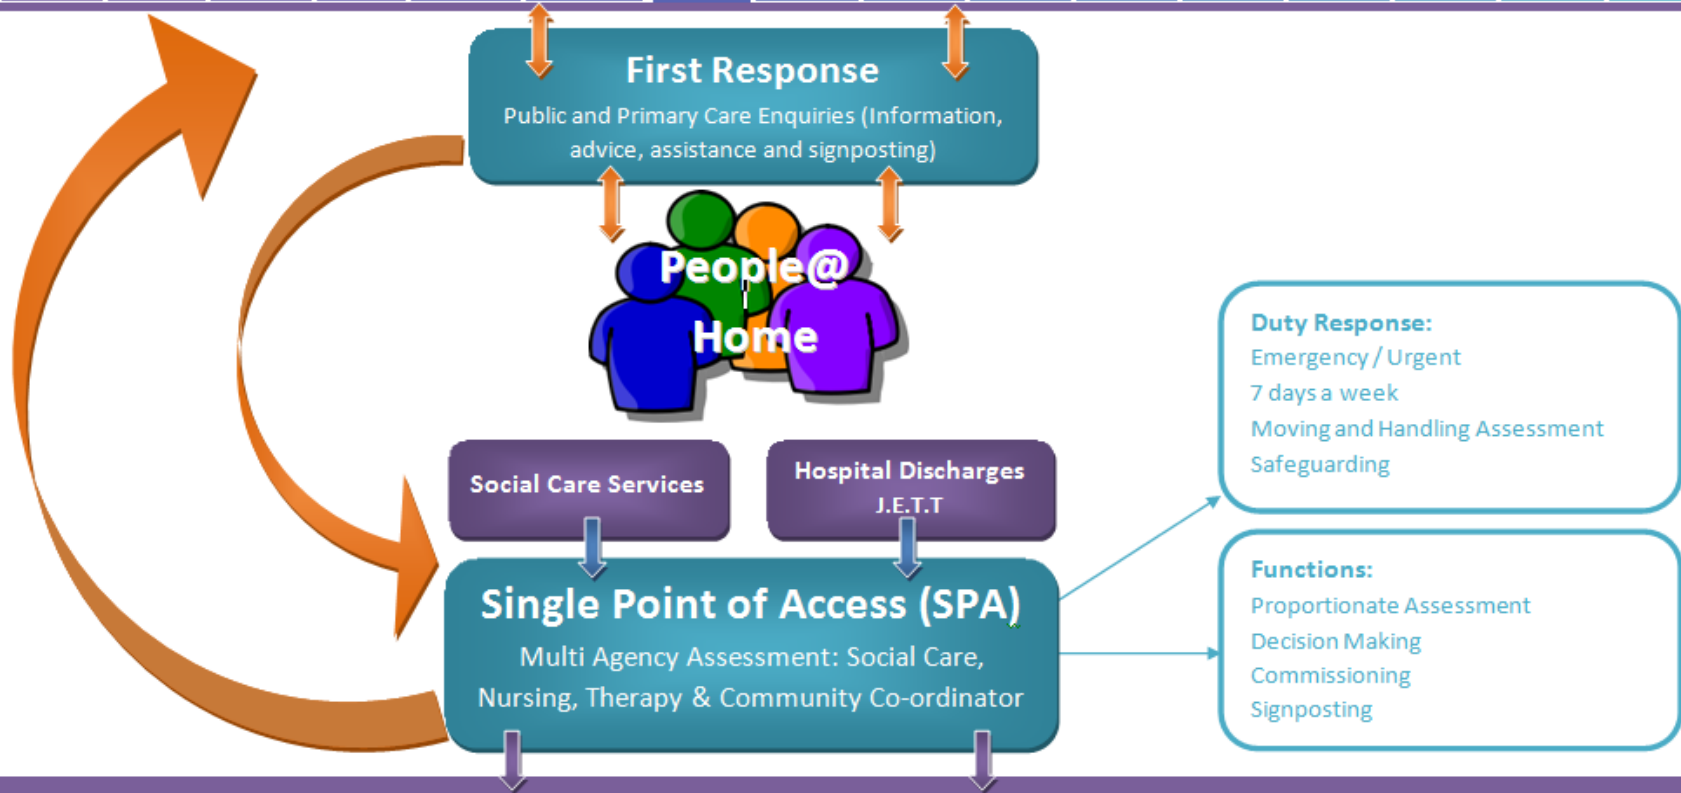

- Understand and evaluate the impact of the new Social Services and Wellbeing Act
- Continue to work on changing the culture with our staff and residents of RCT
- Continue to monitor performance and refine service provision
- Evaluate the effectiveness of equipment provision over a 1 year period
- Build on current model of service provision
- Establish a formal partnership agreement with CTUHB for an integrated @home service

Proposal for an integrated @home
