

CWM TAF COMMUNITY SAFETY DELIVERY PLAN 2018/21

1. PRIORITIES ARISING FROM COMMUNITY SAFETY NEEDS ANALYSIS 2017

This Delivery Plan should be read in conjunction with the Cwm Taf Community Safety Needs Assessment 2017 (Version 11) which identified the following as Priorities for co-ordinated action by the Community Safety Partnership for Cwm Taf.

The Plan is a three year plan and will be subject to quarterly monitoring by all partners through the relevant Partnership Group, with reports being presented to the Community Safety Board on an exception basis to highlight areas of good practice or actions which are not on target.

Key Cwm Taf Community Safety Priorities

Cross Cutting Priority- To Improve Communication and Engagement with our Communities.

- This will be a priority action against all specific priorities identified.

Specific Priorities:

- Priority A: Reduce the impact of alcohol and drug misuse on our communities
- Priority B: Divert offenders and reduce re-offending
- Priority C: Tackle violence against women, domestic abuse and sexual violence
- Priority D: Promote safe and confident communities
- Priority E: Protect vulnerable groups from harm and victimisation
- Priority F: Improve our environment by reducing environmental crime

Relevant Key Performance Measures: where appropriate are identified against service priorities in this Delivery Plan.

Cwm Taf Community Safety Partnership Outcome Measures: How we will know we are making a difference.

- More people in Cwm Taf feel safe in their community
- Less people in Cwm Taf report substance misuse
- Less people in Cwm Taf are victims of domestic abuse and sexual violence
- Less people in Cwm Taf are victims of anti social behaviour
- More people in Cwm Taf are prevented from being homeless
- Less people in Cwm Taf are first time entrants to the criminal justice system

2. CWM TAF COMMUNITY SAFETY DELIVERY ACTION PLAN

<p>PRIORITY A</p>	<p>Reduce the impact of alcohol and drug misuse on our communities</p>
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • Cwm Taf has the highest rates of drug misuse deaths and alcohol related deaths in Wales. • Of the 22 Local Authorities in Wales, Merthyr Tydfil and Rhondda Cynon Taf rank first and second respectively for the rate of alcohol use and fifth and eleventh respectively for drug use. • Children adversely exposed to drug use and alcohol use through the environment they live in are at increased risk of poor life outcomes. Tackling misuse of alcohol and drugs at an early stage will help reduce the risk of adverse childhood experiences for our young people. • Alcohol accounts for 62% of referrals to substance misuse services in Cwm Taf with other drugs making up the remaining 38%. An integrated approach to substance misuse services will help focus resources on early intervention and prevention. • Drug related offending has reduced overall but community concern about the issue remains high. Offenders with substance misuse issues also require particular approaches to reduce the risk of re-offending attributable by their addictions. • Emerging threats of novel drugs such as Spice require continued focus as do the threats of Criminal Gangs (County Lines). Improved intelligence about emerging trends will help reduce drug related crime further and improve public confidence in action being taken.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term</i> <i>Prevention</i> <i>Integration</i> <i>Collaboration</i> <i>Involvement</i></p>	<p>The development of the new Integrated Substance Misuse Service will: Provide a long term response to substance misuse services in Cwm Taf. Focus on Prevention and Early Identification / Intervention to engage individuals to address problems before they become an issue that requires treatment at tier 2 and 3. The new service model will improve partnership working as the new provision will be commissioned as through a Lead Provider tender exercise. Cwm Taf APB will identify opportunities to access other funding streams within Cwm Taf to “pool resources” and achieve efficiencies where possible. Service User Involvement has always been a key priority for the APB. The SUI strategy is being refreshed in 2018: in addition a new SUI strategy for Children and Young People is being developed. Effective collaboration to share intelligence about emerging threats will prevent drug related crime in the long term. Sharing information with communities about action being taken will ensure they feel involved and understand the action being taken to protect our communities.</p>

<p>PRIORITY B</p>	<p>Divert offenders and reduce re-offending</p>
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • There has been an overall reduction in re-offending rates and in the volume of re-offending committed by adult re-offenders across Cwm Taf since 2011. The smaller group of offenders identified may however have more complex needs and challenging behaviours. This demands a problem solving approach to reduce harm and impact on families and the community. • There is a need for a collective focus on addressing the risk factors that increase the likelihood of re-offending e.g. housing issues, drug/ alcohol misuse, relationships. Offender management programmes that focus on these issues are most likely to be effective. • Projects to divert first time, young offenders from the criminal justice system have been proved to be effective in reducing re-offending, as has a similar project working with female offenders. Continued support of this type of programme will be beneficial long term. • High risk offenders require focused, multi agency, public protection arrangements to ensure public safety. • Interventions to target the behaviour of perpetrators of domestic abuse has been effective in protecting victims. • The Cwm Taf Youth Offending Service continues to be effective in reducing first time entrants to the criminal justice system. The focus on early intervention and prevention including Youth Engagement Projects and Street Disposals will, in the longer term, have an impact on the numbers of young people re-offending.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term Prevention Integration Collaboration Involvement</i></p>	<p>To maintain/improve performance against the Youth Justice Board outcome indicators and the devolved performance measures for Wales in the longer term, with particular attention to the rates of reoffending and use of custody amongst a relatively small cohort of young people.</p> <p>To review, revise and pilot new approaches alongside partners to achieve common goals regarding early intervention and prevention services, and further reinforce prevention activity and diversion from the criminal justice system.</p> <p>RCT Community Safety Department will manage the Cwm Taf Divert 18 – 25 programme, with the long term aim of reducing the number of first time entrants, aged 18-25, into the Criminal Justice System. The programme is very victim focussed with an integrated, restorative approach central to the success of the programme</p> <p>The partnership approach to management of high risk offenders through the WISDOM project will strive to prevent re-offending and protect the public in the long term.</p>

<p>PRIORITY C</p>	<p>Tackle violence against women, domestic abuse and sexual violence</p>
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • There are a high volume of incidents of violence reported to SW Police, despite this volume we are aware that many incidents go unreported, therefore we are dealing with a small proportion of actual abuse. The number of people accessing support services is a small proportion of those affected by abuse. More needs to be done to improve education provision in relation to healthy relationships and gender equality. • There is limited support available to low and medium risk victims, this equates to significant unmet need. Only half of those eligible for support from Independent Domestic Violence Advocate Services in RCT access that service. Reconfiguring our commissioned services in Cwm Taf will focus resources on an integrated approach to tackling areas of need. • Children were present in a high proportion of the household receiving support. There is very little direct support provided to children to combat the impact of domestic abuse or sexual violence within their home environment. A small proportion of children known to domestic abuse services are escalated to statutory children’s services. • A high number of the individuals provided with housing related support were living in either the social or private rented sectors. • The majority of cases (86%) brought to the specialist domestic violence courts result in a positive outcome. We need to continue to focus on holding perpetrators to account and supporting victims during the criminal justice process. • BME, LGBT and disabled victims are not being identified through the MARAC process. • Currently there are limited opportunities for service users to be involved in the design and delivery of services.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term Prevention Integration Collaboration Involvement</i></p>	<p>Promotion of the VAWDASV Strategy and Delivery Plan will ensure our communities understand the integrated, collaborative approach being taken to tackling domestic abuse in Cwm Taf. The reconfiguration of commissioned services will focus on early intervention and prevention as well as specialist services and ensure the integrated Cwm Taf service meets identified needs.</p> <p>The provision of enhanced education provision in schools about healthy relationships and gender equality will support the long term goal of increasing awareness of domestic abuse and encourage all sectors of the community to get involved with the “Ask and Act” approach to tackling VAWSADV.</p> <p>Focusing on supporting victims while holding perpetrators to account will protect and prevent re-offending and in particular ensure less children are exposed to adverse experiences in the home; this is essential to long term prevention of harms to these young people.</p>

<p>PRIORITY D</p>	<p>Promote safe and confident communities</p>
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • Our vibrant, night time economies bring jobs and revenue to our town centres, in particular Merthyr, Pontypridd and Aberdare. This however needs to balance with actual and perceived increases in anti social behaviour (ASB), crime and substance misuse. Evidence shows there has been a significant increase in the number of violence against the person crimes in Cwm Taf over the last 5 years and these are often associated with alcohol use. • Exposure of young people to alcohol can lead to increased incidence of ASB and this can be tackled effectively through Community Alcohol Partnership Approaches. • ASB incidents overall have reduced over the last 5 years but levels in the Rhondda and Taff areas are the highest reported. A stages approach by the Partnership can support early intervention and reduce the need to escalate to formal action. The support of ASB victims is also vital. • In response to public concerns, Merthyr and Pontypridd are subject to Public Space Protection Orders, part of a set of measures to reduce alcohol related ASB in two principal town. • Acquisitive crimes have increased, with many associated with burglary and retail thefts. A strategy to reduce business crime will support economic prosperity in our town centres. • Public perception is that ASB is a significant issue and the Partnership should do more to promote the good work being done to tackle hot spots and offenders in an effort to provide community reassurance.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term Prevention Integration Collaboration Involvement</i></p>	<p>The Partnership approach to targeting positive message about community safety will reassure the public about levels of crime and action being taken in response by all agencies. The review of PACT will also ensure that it remains fit for purpose as a mechanism to involve communities in the collaborative approach to identifying and tackling community issues.</p> <p>Working together to manage the night time economy will also show an integrated approach to preventing crimes associated with alcohol in our towns, in particular violence against the person.</p> <p>The Community Alcohol Partnerships are a collaborative approach to preventing long term adverse impact of alcohol use on our young people, by restricting access and collaborating to offer diversionary activities that the young people want to get involved in. A fully integrated referral and response process to incidents and perpetrators of ASB will also ensure earlier intervention to prevent escalation of behaviours in the long term. The PSPOs implemented in Cwm Taf are another long term measure to prevent alcohol related disorder in our communities.</p> <p>The development of a Business Crime Reduction Strategy for our Town Centres will involve our traders on an integrated, co-production approach to reducing criminal incidents in our retail centres, in particular acquisitive crimes, and support long term economic prosperity.</p>

PRIORITY E	Protect vulnerable groups from harm and victimisation
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • In respect of successful homelessness prevention outcomes, in 2015-16 RCT and Merthyr Tydfil LAs had among the lowest performance in Wales. In relation to positive outcomes for homeless households to whom the LA has a duty to assist, performance in RCT was above the Wales average (of 80%) while Merthyr’s performance was 62.5%. More effective interventions to improve the positive outcomes for households at risk of or who are homeless will support community safety and cohesion and the life chances of individuals affected. • The threat of violent extremism in Northern BCU remains Low but continued focus on the Prevent Strand of the Government Counter Terrorism Strategy is required. • Improved awareness of hate crime and its impacts is required, with training and education vital. • Cwm Taf supports the Syrian Refugee Resettlement Programmes and families relocated to our communities are becoming established. • Rogue traders are targeting the most vulnerable in our communities, through door step sales or telephone scam/ cold calls. The Partnership needs to ensure interventions are available to reduce individuals’ risk of detriment from these crimes. • Child Sexual Exploitation and Human Trafficking are emerging threats in Cwm Taf and in conjunction with Safeguarding Board, we need to improve intelligence sharing and information gathering to prevent crimes and protect victims. • Vulnerable people and families with complex needs require support to access the right services to improve their resilience and life chances.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term Prevention Integration Collaboration Involvement</i></p>	<p>Improving the way we communicate, consult with and involve residents in community safety will help facilitate improved access to services and agencies for our most vulnerable residents. The work being done collaboratively on Community Zones will further enhance the opportunity for residents to get involved in their communities. Development of effective Homelessness Prevention Strategies will ensure the prevention agenda is the continued focus of housing solution services in Cwm Taf and delivery of long term solutions for homeless households. Delivery of the Prevent strand of the Counter Terrorism Strategy is essential to the long term prevention of radicalisation in our communities and requires an integrated approach to education and awareness raising, as well as a partnership approach to working with individuals identified as “at risk”. Improved intelligence across agencies dealing with people at risk of or victims of human trafficking, child sexual exploitation, modern slavery and rogue traders will ensure an integrated approach to protecting people from harm and prevention and detection of crime.</p>

PRIORITY F	Improve our environment by reducing environmental crime
<p>Why do we need to do it? What difference will delivering this priority make to residents of Cwm Taf?</p>	<ul style="list-style-type: none"> • Environmental Crime and ASB in the Countryside is a particular issue in Cwm Taf notably in relation to fly tipping, off road bikes and grass fires. • Improved management of incident reports is enabling LAs and partners to identify fly tipping hot spots and investigate offenders. • Although illegal off road vehicle use has seasonal trends, with incidents higher in the summer, the number of incidents reported remains constant and an intelligence led, partnership approach between multi agencies and land owners is essential to tackling the problem. • Grass fire incidents in Cwm Taf have decreased in recent years following successful partnership approaches, led by SW Fire and Rescue. Continued vigilance and education however remains important. • Road Traffic collisions data has remained constant for the past 5 years following a fall in 2012-13. Young drivers are a particular problem in Cwm Taf, committing offences relating to non use of seat belts, ASB in cars, misuse of phones and drink and drug driving. Continued delivery of road safety training and young driver programmes aims to reduce road traffic offences and collisions in this age group in particular.
<p>How have you considered the Sustainable Development Principles i.e. 5 ways of working, in delivering this priority?</p> <p><i>Long term Prevention Integration Collaboration Involvement</i></p>	<p>An effective media campaign to raise awareness of illegal off road vehicle problems will help prevent crimes. Involving our communities in identifying hot spots and being proactive in reporting incidents will help improve the collaborative response to the problem.</p> <p>Provision of additional driver skills and knowledge will result in the medium to long term in safer drivers. The impact on future generations is that improved knowledge and experience is likely to result in better driver behaviour and less young driver collisions in the future. The road safety initiatives will integrate with the Welsh Government's well-being objectives to promote good health and wellbeing for everyone. The preventative projects will help reduce the number of drivers involved in collisions, which will have positive impact on public services such as the Police, Ambulance, Fire and Rescue Service and the NHS.</p> <p>The partnership approach to tackling grass fires has already been effective in preventing incidents and the healthy hillsides project is a long term solution to the problem of grassland management in Cwm Taf. The collaborative approach taken to tackling fly tipping will also help reduce incidents and hold perpetrators to account, with the aim of changing peoples' waste management behaviour in the long term.</p>
