Privacy Impact Assessment- Public Space Surveillance Cameras

The privacy impact assessment (PIA) is recommended in the surveillance camera code of practice issued by the Surveillance Camera commissioner, in accordance with section 30(1) (a) of the protection of freedoms act 2012. The purpose of the PIA is to ensure that privacy risks are maintained while allowing the aims of the project to be met whenever possible.

CCTV can be privacy intrusive, as it is capable of putting many law abiding people under surveillance recording their movements as they go about their day to day activities.

We must take into account what benefits are gained, whether other solutions exist, and what effect it may have on individuals.

These matters should be considered objectively as part of an assessment process on people's privacy when considering the deployment of CCTV cameras.

We will use the results of the impact assessment to determine whether CCTV is justified in all the circumstances and if so how should it be operated in practice.

Camera Number: Rhydyfelin Community Centre	Date: 12/06/2020	Name: Claire Quick
Position: PCSO	Organisation: South Wales Police	
Location: Rhydyfelin Community Centre		

1. Why is your organisation considering the use for using CCTV?

Yes	Crime and Disorder	Yes	Antisocial Behaviour		Hate Crime
